

North Brisbane Catchments Newsletter - March 2023 (v2)

Butterfly Walk

We were led by Jutta Godwin (Brisbane's Big Butterfly Count) and butterfly expert Louis on a butterfly survey walk in Seventh Brigade Park, Chermside.

Bushcare Groups

Our official Bushcare groups at 7th Brigade Park and Virginia are now well established.

These groups engage the community to support habitat regeneration by weeding, planting, and maintaining native plants which support local wildlife habitat and connectivity.

To get involved please message us or email us via NorthBrisbaneCatchments.org.

Microbat Walk

Microbats at Chermside Hills

The well-attended Microbat Discovery Walk at Chermside Hills was led by Brisbane Catchments Network's Jutta Godwin & PhD candidate Kristen Thompson on March 17.

Grants

We've still been very busy applying for grants including:

Queensland Government Gaming Fund (Water Testing Equip) – Not granted due to a documentation technicality out of our control.

Federal MP Anika Wells' Lilley Volunteer Grants – Still waiting on outcome. We're hopeful. Equipment and other resources like website hosting is very needed.

We continue to actively source funding.

Downfall Creek Renaturalisation

An initial stakeholder meeting is being scheduled to discuss the generous Federal \$2.5m funding. Stakeholders include Federal MP Anika Wells (funding provider), NBC, Brisbane Catchments Network, BCC Catchments Officers and more.
